A Good House

Leaving a good house unpainted is as imprudent as leaving greenbacks out in the rain. A house unprotected by good paint cracks and rots and is unsightly all the time.

Whatever you do, paint!

Whenever you paint, use pure white lead paint. You will have the best if it is

Collier Pure White Lead

(Made by the Old Dutch Process)

mixed with Pure Linseed Oil.

Accepted as the standard everywhere by those who know.

Learn all about paints in our handsomely illustrated free booklet, sent on application. Gives test for paint purity.

Our Pattern Department

GIRLS' APRON WITH ROUND OR SQUARE NECK.

Pattern No. 5576.—A square berth adorned this pretty little apron, made of white crossed-barred muslin, trimmed with insertion and edging. The pattern provides for either round or square neck, and pockets are a useful addition that will be appreciated by the little girl. Broad ties of the material adjust the fullness at the back. Lawn, gingham, chambray and linen are all suggested for the making. The medium size will require two and one-eighth yards of 36-inch material. Sizes for 3, 4, 5, 6, 7, 8 and 9 years.

This pattern will be sent to you on receipt of 10 cents. Address all orders to the Pattern Department of this paper. Be sure to give size and number of pattern wanted. For convenience, write your order on the following coupon:

A MISSES' PRETTY SHIRT-WAIST.

Pattern No. 5620.—This dainty design for a blouse waist is unusually attractive. Fine tucks in the front and back produce a graceful fullness that is very becoming to the youthful figure. A yoke stay is arranged under the square cut neck, but if preferred it may be omitted, and the edge finished by a tiny frill of lace. White lawn was the material chosen, but albatross, challis, pongee and taffeta will all be suitable. The medium size requires two yards of 36-inch material. Sizes for 14, 15, 16 and 17 years.

This pattern will be sent to you on receipt of 10 cents. Address all orders to the Pattern Department of this paper. Be sure to give size and number of pattern wanted. For convenience, write your order on the following coupon:

NEW PLANT LIFE

DR. MACDOUGAL SUCCEEDS IN ORIGINATING NEW SPECIES.

Marvels in Botanical Science Which the Director of the Carnegie Institute at Washington is Accomplishing.

The task of originating entirely new species of plants has been accomplished, and Dr. Daniel Trembly MacDougal, for years assistant director of the New York botanical garden, several months ago appointed director of botanical research at the Carnegie Institution, in Washington, claims the honor of the discovery.

In his investigations on the origin of species Dr. MacDougal has pursued lines similar to those followed by Prof. Jacques Loeb, of the University of California, in his investigation of the origin of animal life, but Dr. Mac-

FLOWER WITH PETALS REMOVED.

(Pollen From the Anther (A) are Carried to the Stigma (B), Where the Pollen Cells Germinate and Send Out a long, Slender Tube, Which Penetrates the Stigma and Follows Down the Style (C) to the Ovary (D).)

Dougal's experiments have been more radical and his success is established.

It may be explained, so that the process of plant birth may easily be understood, that the ovaries of all evening primroses, for instance, the subjects of Dr. MacDougal's tests, contain 200 or 300 ovules, each of which includes one egg cell. Pollen cells from the anther of the flower are carried to its stigma by insects or by direct contact of the stamens and stigma. Then the pollen cells germinate and send out a long, slender tube which penetrates the stigma and follows down the style to the ovary, where the nucleus carried by the tube unites with the egg cell to form the fertilized egg. It is before the tube reaches the ovary that the injection is administered by Dr. MacDougal by means of a very fine hypodermic syringe.

In Dr. MacDougal's flower tests the action of the solutions on the egg cells was such that new qualities were added and some existing qualities destroyed or thrown into a latent condition, fertilization taking place in the usual manner, and the individual produced by these altered eggs differed notably from the parent that is to say, changes in the heredity of the organism were induced. The divergent individuals resulting from such experiments were healthy, reached maturity, bloomed, produced seed, and are perpetuating themselves. They are dwarf plants, about one-quarter the size of the parent.

It is believed to be the first conclusive proof yet obtained that agencies external to the cell may induce mutations, and consequently exert a profound influence upon heredity.

Dr. MacDougal attends to the cultivation of his plants himself, allowing no one to touch them. As the plants appear he watches them carefully. If the leaves of a plantlet are similar to those of its parent that plantlet is pulled up and destroyed. Should the leaves show any variation it is allowed to grow until the gardener-scientist is able to satisfy himself beyond doubt that it is a new type. Then the plant is potted, ticketed and preserved for the purpose of continued observation and experiment. In this way he is able to keep track of thousands of plantlets, and aside from the results obtained by treating ovaries with injections, has procured a dozen distinct species.

Sure of That.

"I suppose," said the tenderfoot, preparing to mount the bucking broncho, "this horse may behave all right with me and then again he may not."

"Well," replied the wise cowboy, "it's a toss up."—Famous Quotations.

The Young Physician.

WHAT HIS EXPERIENCE PROVED.

In the early sixties it was usually the duty of a practicing physician to ride many miles every day on his regular round of visits upon his patients. In those days a young man who had received a splendid medical training in one of the best medical colleges of that day was accustomed to ride ten, twenty, thirty miles or more visiting the sick and afflicted. His success was soon phenomenal. Doctors and families called him for consultation to towns at considerable distances by rail. His specialty was the cure of those common and distressing diseases of women. He had early discovered that by combining the extracts of the following medicinal plants, in just the right proportion, without the use of alcohol, his "Prescription" almost invariably cured such cases. Later, in order to place this remedy before the public in a shape easily to be procured, he established a laboratory at Buffalo, N. Y., where regularly qualified chemists were put in charge to accurately prepare his "Prescription" and put it in shape for shipment to all parts of the world. This remedy, which he named Dr. Pierce's Favorite Prescription is not a "patent medicine" but a tonic and nerve for women, and a regular physician's prescription, and contains the following ingredients: Lady's Slipper root, Black

Cornish root, Unicorn root, Blue Cohosh root, Golden Seal root, and chemically pure glycerine.

Dr. Pierce does not claim for his "Favorite Prescription" that it is a "cure-all." It is recommended as a most perfect specific for woman's peculiar ailments. So uniform are the results which follow the use of this remarkable remedy, that it can be truly affirmed of "Favorite Prescription" that it cures. Ninety-eight per cent. of the women who give this medicine a fair and faithful trial are cured and remain cured.

It is a powerful invigorating tonic, imparting health and strength in particular to the womb and its appendages. The local, womanly health is so intimately related to the general health that when diseases of the delicate womanly organs are cured the whole body gains in health and strength. For weak and sickly women who are "worn-out," "run-down" or debilitated, especially for women who work in store, office or schoolroom, who sit at the typewriter or sewing machine, or bear heavy household burdens, Dr. Pierce's Favorite Prescription will prove a priceless benefit because of its health-restoring and strength-giving power.

THE PROOF.
"I want to tell you of the great improvement in my health, since taking your 'Favorite Prescription,'" says Mrs. H. S. Jones, of Forest, N. C. "When I began its use I was a physical wreck and had despaired of ever having good health again. Could not sit up all day. I noted a great improvement before the first bottle was all used. Was suffering with almost every pain that a woman is subject to; had inflammation of the ovaries, painful and suppressed periods, and other symptoms of female disease. After taking six bottles of 'Favorite Prescription' I felt like a new person. Can ride horseback and take all kinds of exercise and not feel tired."

Only one or two of these tiny, sugar-coated Pellets will regulate, tone up and set in healthy, vigorous action a foiled stomach, torpid liver and sluggish bowels. Little Pill, little dose; produce great results. First put up by old Dr. R. V. Pierce, over 40 years ago. Much imitated but never equaled.

Send 31 one-cent stamps to cover cost of mailing and get a copy of the "Common Sense Medical Adviser," over 1000 pages. Address Dr. R. V. Pierce, Buffalo, N. Y.
